

Multi-Tiered System of Support Guidelines for Behavior

ACPS is committed to a Multi-Tiered System of Support (MTSS) that is needs-based and holistic. This system is aligned with early identification, data-based decision making, and implementation of evidence-based practices of appropriate intensity and duration. Students displaying the need for additional support in the areas of social, emotional, or behavioral development will be provided services and interventions that address their specific need.

Multi-Tiered System of Support: Social, Emotional, Academic Learning (SEAL) Approach
